PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented AI and Data Science engineering student with project-based experience on the Salesforce platform, aiming to begin a career as a Salesforce Administrator / Developer. Demonstrates strong problem-solving abilities, solid understanding of CRM processes, and a commitment to continuous upskilling through Trailhead, certifications, and real-time projects.

EDUCATION

•Artificial Intelligence and Data Science

2022–2026

Guru Nanak Institute Of Technology, Hyderabad

CGPA: 8.00

PROJECTS

•Student Management System – Salesforce

Declarative Salesforce Project

- Created a custom Student object with multiple custom fields.
- Designed page layouts for better usability.
- Implemented validation rules to ensure accurate data entry.
- Generated reports to track student data efficiently.
- Configured the app using Salesforce App Builder.

•Sales CRM with Automated Lead Scoring in Salesforce

Salesforce CRM & Flow Automation Project

- Designed and implemented a mini Sales CRM on the Salesforce platform.
- Automated lead scoring and qualification using Record-Triggered Flows and custom fields.
- Improved lead prioritization by categorizing prospects based on engagement and score.

•AI-Powered Lead Insights for Salesforce CRM

Salesforce + AI Concept Project

- Developed a concept project integrating Salesforce lead data with AI-based analysis.
- Generated actionable insights and recommendations to assist sales teams in decision-making.
- Focused on enhancing CRM intelligence through data-driven sales insights.
